Beautiful...just beautiful. I live near Waldren, so I appreciated the beauty of the area. Then to add his music & story telling. AMAZING!!! I've shown this to friends

who don't like choral music & they stole my copy. We played this for a room full of semi-famous, hyper-critical singer/songwriter types & they just wept.

**We are so fortunate to live in the age of this composer...**

By Mary VanCotton January 29, 2015

I thoroughly enjoyed this special inside view of this amazing modern-day composer. Seeing where he lives, hearing what inspires him, and having the opportunity to hear his pieces performed by top-notch groups makes this a most wonderful viewing experience. When it was over, I realized I just wanted to walk along the beach with him and listen to just about anything he wants to say. Calming, peaceful, entertaining and especially interesting to anyone who loves beautiful music and a great story to go with it.

I have watched Shining Night many times and can watch it again and again. That

most of his music came to life on an antique 50 Dollar Steinway is a wonderful thought.

Morten Lauridsen with his Danish background coming from a small Danish island I can almost hear the Viking blood role in his veins and music. I love it.

**An Opening into the Cosmos at Large**

ByBokononeron December 7, 2014

A triple treat, this DVD is worth repeated viewings as a travelogue, as a character study, and as an important bit of music history. Choral music has never been high on my personal list of favorite experiences--until now. Morten Lauridsen's quiet competence and creativity have won me over. He communicates equally effectively in words, with piano, by presence and gesture, and above all in his music which deeply connects into traditions of harmony and communal experience while preserving an innovative voice. Highest praise.

**this film brilliantly captures Dr**

ByMaestroon December 5, 2014

A look into the life of one the most beloved and performed choral composers, this film brilliantly captures Dr. Lauridsen's love and passion for nature. Set on the island where he spends his summer composing, we catch a glimpse into Lauridsen's creative process and hear him share his own philosophy of music, especially choral music. I am anxiously awaiting the sequel to this award winning film.

**A Beautiful Film about Lauridsen and his Sublime Music**

By Deborah Rose on August 5, 2014

In June I attended a lunchtime concert by the choir of Lincoln Cathedral, visiting from England, at Trinity Church in Boston. As their encore they performed Lauridsen's *Magnum Mysterium*. I was utterly moved that humans can create such beauty and left the church in tears. That night I researched Morten Lauridsen on Amazon. I had heard his *Magnum Mysterium* sung in church before, but it had sounded as if it had existed for centuries (as when a contemporary songwriter writes a song that sounds like a folk song that has been passed down for ages); I had not realized before that it was written by a contemporary American composer.

The film is hauntingly beautiful and as inspirational as anything I have seen. I am thinking especially of the scenes of Waldron Island in the Pacific Northwest, Lauridsen's beloved place, when the camera pans over the darkening sea and sky as "Shining Night" is sung. These seascapes remind me of my own beloved place, coastal Maine, where I also feel connected to the cosmic happenings over the bay, day and night, sunrise and sunset and moonrise, the daily and the eternal.

This music reaches into my soul, as it seems to do for people all around the world. I will watch this film over and over. It corrects the perspective and puts one in touch with what is really important. If the world is too much with you, watch it and feel uplifted to a higher plane. I have already shown it and lent the DVD to others I care about.

I will add that, although the film has Morten Lauridsen talking about composing his music and shows him sitting at the piano and in his composing cabin working, it is still a mystery how he actually does it--the moment of creation. He seems to reach high and deep into the mysteries of human life in this world, the cosmos even. I am in awe, and I am so glad I discovered this film.

**An exceptional video**

By Dana Gartneron February 20, 2014

This video is beautifully constructed--scenes of the Pacific Northwest, the inspiration and genius of the composer, and music more touching than you can imagine. I am a classical musician, singer, and pianist of many years who appreciates silence and space, and I love the rare music that allows for this. My experience is that Morten Lauridsen's music is special in this way. Watching and listening to the video itself instill peace and well-being. I have now ordered more copies for friends.

**suggestivo racconto del processo creativo di un genio / striking picture of the creative process of a genius**

ByAmazon Customeron January 24, 2014

Immagini molto suggestive dei luoghi che hanno ispirato a Lauridsen i suoi più grandi capolavori. Avrei voluto però che avessero dato maggiore spazio all'analisi dei brani stessi e non solo all'idea di fondo. In ogni caso, lo consiglio molto a tutti gli appassionati di musica corale contemporanea.

Very suggestive images of the places that have inspired Lauridsen's greatest masterpieces. I wished, however, that they had given greater consideration to the structure of the songs themselves and not only the inspiring idea. Anyway, I recommend it highly to all lovers of contemporary choral music.

**A must for Lauridsen devotees and/or those who appreciate contemplative music**

ByGraham Mon October 16, 2013

A revelation! I've long been a devotee of Lauridsen's music and own several CDs (with multiple awe-inspiring performances amongst them) of his breathtaking works. But this film, with its presentation of an in-depth portrait of the heart and mind of the man behind the works, in its simultaneous complexity of thought and simplicity of spirit, along with his discussion of the inspiration behind his music, extends an entirely new dimension by and through which the man and his music may be understood and appreciated. I was both humbled and inspired watching the composer in his austere but contemplative environment. The interviews with friends and associates were a bit too truncated for my taste (though at least some omitted material was re-inserted in the bonus features). For those who like their music on the heavenly side, and can find inspiration in understanding its creation a bit better, this film is a must.

**Shining Night Video Does Composer Morten Lauridsen Justice**

By Linda L. Simmonson October 5, 2013

Morten "Skip" Lauridsen never disappoints. I've had the pleasure of singing much of his music and at one of our concerts, he even accompanied us on several of his pieces. The only thing I would like to have seen on this video were segments of him working directly with Paul Salamunovich and the Los Angeles Master Chorale, since he was their composer-in-residence during the Salamunovich era (1991-2001). Other than that, purchasing and viewing the video was money and time well spent in order to get a glimpse into his private world that inspires his creations. Five Stars!

By CST of Asheville on October 2, 2013

We wonder how geniuses create their particular art form--and Morten Lauridsen gives us truly a peek into the universe. His talent guides him into artistic expression that beckons all of us to love and treasure the world before us and beyond us. I have watched this movie (a piece of art in itself); I have sung many of his works in choruses; and I have felt myself transported to a peaceful place--the place where I think the Almighty intended all of us to be in our short time on this earth.

**Shining Night brings clear Light and Love**

ByPatti Nyienon May 23, 2013

The beautiful choral music will bring tears to your eyes. This documentary is so informative and beautiful, it is a must see. The scenematic photography is breath taking. The story line is interesting and well detailed. A tale of seclusion and tapping the God - given gifts within the soul of man are the gripping moments that make the glorious music soar. Much has gone into the creative process. The movie presents the work and integrity behind some of the world's best loved choral music by a living composer of our time. It shows the small community that embraces their composer and helps him produce these works. We travel to magnificent cathedrals to hear choral renditions. We see the beautiful Island habitat of the composer and learn how his piano came to dwell with him.

**Lovely film and person**

ByLuceroon April 22, 2013

I really enjoyed this film. Morten Lauridsen's "Lux Aeterna" is one of my favorite works. After seeing the documentary I came away with even more admiration. His music is sublime and he is a very spiritual, yet down to earth person. I would recommend this documentary to those that enjoy his music or choral music in general, and for those that revere the arts and the simple things in life. The footage of the islands and the importance of tranquility and nature are featured in this documentary.

**A mystical documentary about a mystical composer**

Byjwilon April 21, 2013

Morten Lauridsen is the foremost American choral composer of this century. His music is mystical and perfectly wedded to the text, evoking the deepest expressions of the human heart. In this documentary Michael Stillwater is actually able to capture the essence of Lauridsen's music, emphasizing the connection between the music and the composer's beloved island. When I performed Lux Aeterna, I heard the gentle lapping of the water surrounding his island home; I saw in my mind's eye the misty skies that stretch out from the shore. Morten's description of his profound love of place makes clear the mental picture he envisioned as he composed his music. This documentary captures the workings of his creative mind.

**Sublime - I can watch over and over and continue to be inspired**

By K. S. Lawrence on February 16, 2013

It is hard to put into words what I experienced in this film. (that is why we have music after all). There are so many levels of excellence here. First of all, this first time filmmaker has made a lovely documentary. It has the qualities one looks for in a documentary. He allows us to get to know his subject, informing and inspiring us. But the style of filmmaking is a work of art comparable to the artistry of Morten Lauridsen. The film feels like a symphony, weaving in and out of musical/visual motifs. This is perhaps not surprising, because the Michael Stillwater is a talented musical composer in his own right, which is why I was first drawn to the film. And maybe it took another musician to bring the enchanting music of Mr. Lauridsen into a visual work of art.

Morten Lauridsen is one of America's treasures. The Wall St. Journal called him the "best composer you've never heard of" and describes his music as "radiantly beautiful". He has been described as a mystic, but the film shows him also as a man, a nature lover, an artist, a teacher, conductor, performer, and lover of poetry, art, and all things beautiful. This music, that if I had to find words describe, I would use, mystical, transcendent, romantic, sumptuous, moving, even inspiring, is interwoven in the film with pictures of the life of Mr. Lauridsen, many interviews with him and other musicians. There are beautiful shots of Scotland and his stark home on a tiny island off the coast of Washington, where he lives for the half of the year that he is not teaching at USC.

I always find it fascinating to watch documentaries about artists. I am a musician, and getting a little bit inside the head of a creative genius is always inspiring to me.

I was lucky enough to see a screening of the film which preceded a concert of Lauridsen's music sung by the USC Chamber singers and accompanied on two songs by the composer on the piano. I was left speechless for days, swimming in the ecstasy of the kind of music that you are sure comes from angelic realms. If you have an opportunity to hear Mr Lauridsen's music performed live, do indeed rush to do so. But don't miss out on the experience of this film. It will allow you to bathe all of your senses in a work of art, and learn about a really fascinating genius composer at the same time.

**Guest Composer**

ByJoshua S. Gutierrezon September 6, 2012

First off, this isn't a review about "Shining Night" however, it is about the Composer - Morten Lauridsen. Working on my Music Composition degree at Washington State University, Pullman - back in 2002 (I believe - It's been a long long time...lol) Dr. Lauridsen happened to be our Guest Composer for that particular year.

And I remember sitting within the first few rows of our biggest theater in just total awe listening to our Madrigal singer's group performing some of his most renowned choral songs. As i'm sure, at least for those who are familiar with his work, O Magnum Mysterium & Ubi Caritas ET Amor - just brought me to tears...Until then, I had never experienced a performance so powerful and moving. It was then I decided I was going to pursue my degree in music composition.

I had the chance to meet Dr. Lauridsen back then...and an honor it was - Something to be cherished.

Like I mentioned, this isn't a review about "Shining Night"...however, I would suggest for newer listeners - check out: Lauridsen - Lux Aeterna (Los Angeles Master Chorale, Paul Salamunovich's...The cover looks like trees with heavy cloud cover - kind of maroonish looking) & Lauridsen - Northwest Journey.

I met a professor who called his work "Too Simple." I couldn't believe it. He put it - Although his music is touching, it's like he used all the Pretty Notes. (Music majors will understand that reference - kind of like using the "People's Key (c major)" for all of your compositions.

I'm sorry to keep rambling on...Please purchase these cd's. I have absolutely no affiliation with Amazon or with Dr. Lauridsen, however, his music touched me in a way I'll never forget!

ByBriosoon August 30, 2012

I am a singer and have sung many of Lauridsen's choral compositions over the years. I was always inspired by his works but had little knowledge of the composer before watching the DVD "Shinning night" The producer of the DVD did a brilliant job. He explains who Lauridsen is and where he gets his inspiration for his wonderful compositions. To say I was utterly inspired by the DVD is an understatement. It was so moving it left me spellbound. Every singer should watch this inspirational DVD.
